NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. The amount to be paid was determined to be £87,686 per annum ; this to be in addition to 4,166,220 okes of Salt to be paid in kind.

General information regarding the industry and the possibilities of development

Although the forests of Cyprus were delimited with an area of 700 square miles in 1892 they now comprise an area of 649 square miles.

They are situated on the two main ranges of mountains :—

(*a*) the southern range, extending across the south-western end of the Island, from Stavrovouni to Cape Acamas ; and

(*b*) the northern range, running from Cape Andreas to Cape Kormakiti. Except at the western end, where there are 15 square miles of forest, the forests on the northern range are confined to the hill tops.

There are eight main forests, namely:

	Area
(1) Paphos and Kykko	232.90 square miles
(2) Troödos	42.10 ,,
(3) Adelphi	48.08 ,,
(4) Machæra	11.11 ,,
(5) Ayia Erini	5.14 ,,
(6) Kartal Dagh	7.23 ,,
(7) Limassol	20.00 ,,
(8) Aetomoutti	3.07 ,,
Total ...	369.63 ,,
Forest Plantations	8.16 square miles

Of these 129.27 square miles are either bare, burnt, "cut-over" or comprise rocky, river bed, road, path or other non-forest-bearing areas.

There are also mixed timber and scrub forests covering a total area of 279.37 square miles of which 179.67 square miles are rocky, bare, burnt or "cut-over," road, path or river bed areas.

The principal forest trees are :—

Pinus Halepensis ; Pinus Nigra, Subsp. (Palliasiana) ; Cupressus Sempervirens ; Quercus Alnifolia ; Platanus Orientalis ; Alnus Orientalis ; Cedrus Libanotica, Var. Brevifolia ; Arbutus Andrachne.

There are seven Saw Mills situated in the forests and one in Nicosia which partially meet the timber requirements of the Island. Planks, boards, scantlings and rafters are chiefly cut, but also wooden implements, such as shovels and forks, and cart material, such as felloes and spokes, are also made.

Except for the licenses mentioned in the annexed table, all forest operations and exploitation of the forest products are conducted by the Forest Department.

* Permits for small quantities issued to villagers.

General Information regarding the industry and the possibilities of its development

In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats have certainly increased of late years but there is still plenty of room for improvement. Two Italian sailing trawlers did good work during the summer and autumn months at Limassol and demonstrated the practicability of increasing the production of this very valuable article of diet by more up to date methods than those practised by Cypriots.

The sponge fishing has since the year 1903 been entirely under the control of the Government.

The fishing is principally carried on by fishermen from the Greek Islands who arrive in the Island in the spring and fish through the summer.

Each boat must be provided with a licence according to capacity, the following fees being charged :—

	£	s.
(*a*) For each boat fitted with machine diving apparatus, crew not exceeding 30 persons.	100	0
(*b*) For each boat fitted with the "Fernez" apparatus only, crew not exceeding 15 persons.	50	0
(*c*) For each boat with naked divers, crew not exceeding 8 persons.	25	0
(*d*) For each boat with harpoon (kamaki) crew not exceeding 6 persons.	12	10

In 1925 2 Cyprus Harpoon Boats and 13 Harpoon Boats from the Greek Islands worked from April to September: the total catch was 1,500 okes which was all taken away from the Island and sold for about £2 an oke.

(*a*) Some small factories are not included in this return.
(*b*) Primitive kilns, of which no details are available, are also found in certain localities.
(*c*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.
There is also a large number of primitive oil mills (with an output of over one million okes) and primitive rope making establishments of which particulars are unobtainable.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

Cyprus is essentially an agricultural rather than an industrial country. Development has been considerable in the following industries : mining (especially copper pyrites, chrome and umber). wine and spirit making, fruit preserving, flax, cotton, silk, leather-curing and gypsum. Animal breeding, especially of horses, cattle, pigs, mules and donkeys, is progressing satisfactorily.

Re-afforestation under the Forest Department is being pushed forward rapidly.

The importation of mechanical tractors, agricultural machinery and chemical manures continues to increase.

Cyprus-grown tobacco is now finding a market on the Continent and experiments are being made to cultivate the Latakia variety.

Among minor industries, bee keeping on modern methods is developing. The Cyprus bee is noted for its value in the apiary.

Activity continues to be shown in the industry of weaving. A great variety of silk and cotton fabric of excellent quality is manufactured and finds a ready sale in both European and local markets notwithstanding the fact that the manufacture is conducted in a primitive method by the means of hand looms which are made locally. A modern silk-filature has been erected by Government and a privately crossed filature is in course of erection. Three flax-scutching factories are in operation.

Furniture making and shoe making have progressed considerably.

The art of embroidering is also well advanced, a great number of women and girls are engaged on needlework and lace-making. The latter is in wide demand abroad.

No Government grants for the development of industries have been made during the year.

LABOUR, WAGES AND COST OF LIVING.

This section should contain full particulars with regard to labour and wages, including piecework, especially agricultural labour.

The list containing the average prices of articles should include *all the chief staple articles* consumed or used locally. The prices given should be the *retail* prices, showing the maximum and minimum rates, and the average rate ruling throughout the year. The average *wholesale* export rates (f.o.b.) of the staple products of the Colony during the year should be given for each month of the year as well as for the whole year.
