NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. The amount to be paid was determined to be £87,686 per annum; this to be in addition to 4,166,220 okes of Salt to be paid in kind.

The sum of £113 11s. 3d. per annum also became payable, under the same Annex, since the 4th September, 1884, when the Cyprus Government took over the administration of the Lighthouse Service in the Island. This sum represents 22% of the receipts of the Ottoman Lighthouse Administration which the Sublime Porte enjoyed under the concession granted the Company for lighting the Coast of Cyprus.

By a further Agreement of 3rd February, 1879, a further sum of £5,000 was to be paid annually to the Porte in respect of the produce of State lands

The forests of Cyprus cover an area of 700 square miles. They are situated on the two main ranges of mountains:

(*a*) the southern range, extending across the south-western end of the Island, from Stavrovouni to Cape Acamas; and

(*b*) the northern range, running from Cape Andreas to Cape Kormakiti. Except at the western end, where there are 15 square miles of forest, the forests on the northern range are confined to the hill tops.

There are five main forests, namely:

	Area
Paphos Main Forest	100 square miles
Troödos	42.69 ,,
Adelphi	48.08 ,,
Machæra	15.26 ,,
Ayia Irene	3.00 ,,
Kartal Dagh	8.10 ,,
Total ...	217.13 ,,

There are also mixed Timber and Scrub forests covering a total area of 482.87 square miles.

The principal forest trees are :—

Pinus Halepensis, Pinus, Nigra (var. Laricio), Cupressus Sempervirens, Quercus Anifolia, Platanus Orientalis, Alnus Orientalis, Cedrus Libani.

There are six Saw Mills situated in the forests which at present meet the requirements of the Island. Experiments have been carried out in the destructive distillation of forest products, and it is hoped that, in the near future, this will prove an important source of revenue.

Except for the concessions mentioned in the annexed table, all forest operations and exploitation of the forest products are conducted by the Forest Department.

3.—FISHERIES.

Catch of Fish			Number of boats and persons engaged in fishing	General Information regarding the industry and the possibilities of its Development
Kind of Fish	Quantity	Landed value	Number of boats engaged in fishing	In the sea around Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman, few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats have certainly increased of late years there is still however plenty of room for improvement, possibly the employment of a drifter or trawler might lead to the development of this most important industry and an increase in production of a very valuable article of diet.

The fishing in the past was principally carried on by men from the Greek Islands who arrived in the Island in the spring and fished through the summer, areas being allotted to them by the Inspector of Fisheries on payment of a fishing license and 20 or 25 per cent. of the catch (in kind) being also paid to Government.

				In 1921 three Cyprus boats only fished for sponges from May to July, the total catch being 77½ okes good sponges and 2½ okes skarta; of which the Government share was 15½ okes good and ½ oke skarta.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Island during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Island.

Cyprus is essentially an agricultural rather than an industrial country. Development may be expected in the following industries (but except in mining no marked development has occurred in 1921), mining, wine and spirit making, fishing, fruit and vegetable drying or preserving, cotton, silk, gypsum, and industries connected with olive oil products. Animal breeding, especially of mules and donkeys is progressing.

Progress in mining has also been maintained at Skouriotissa, where material and plant to the approximate value of £25,000 has been imported for the mine, and whence 11,552 tons of cuprous pyrites has been extracted during the year. The extraction of asbestos at Amiandos has continued.

Among minor industries, bee keeping on modern methods is developing. The Cyprus bee is noted for its value in the apiary.

Activity has been shewn in the past, and especially in the last few years, in the Industry of Weaving. A great variety of Silk and Cotton fabric of excellent quality is manufactured notwithstanding the fact that their manufacture is condncted in a primitive method by the means of hand looms which are made locally.

Cotton fabric of various kinds, many of which compete with the European cashmeres, are woven in the looms and sold locally on a large scale for suits ; a large portion of them is exported.

The art of embroidering is also well advanced, a great number of women and girls are engaged on needlework.

No Government grants for the development of industries has been made during the year.
