NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. By a further Agreement of 3rd February, 1879, a further sum of £5,000 was to be paid annually to the Porte in respect of the produce of State lands.

Concessions and Permits			General information regarding the industry and the possibilities of development
Concessions, cutting permits, etc.	No.	Area covered.	Although the forests of Cyprus were delimited with an area of 703 square miles in 1892 they now comprise an area of 632.96 square miles. They are situated on the two main ranges of mountains :— (*a*) the southern range, extending across the south-western end of the Island, from Stavrovouni to Cape Akamas ; and (*b*) the northern range, running from Cape Andreas to Cape Kormakiti. Except at the western end, where there are 15 square miles of forest, the forests on the northern range are confined to the hill tops. There are eight main forests, comprising an area of 397.57 sq. miles. Of these 74.50 square miles are either bare, burnt, "cut-over" or comprise rocky, river bed, road, path or other non-forest-bearing areas. There are also mixed timber and juniper forests covering a total area of 227.38 square miles of which 110.00 square miles are rocky, bare, burnt or "cut-over," road, path or river bed areas ; and forest plantations covering 8 sq. miles. The principal forest trees are :— Pinus Halepensis ; Pinus Nigra, Subsp. (Pallasiana) ; Cupressus Sempervirens ; Quercus Alnifolia ; Platanus Orientalis ; Alnus Orientalis ; Cedrus Brevifolia ; Arbutus Andrachne. There are seven Saw Mills situated in the forests and one in Nicosia which partially meet the timber requirements of the Island. Planks, boards, scantlings and rafters are chiefly cut, but also wooden implements, such as shovels and forks, and cart material, such as felloes and spokes, are also made. During the year over 700 kinds of wooden articles were made from different species of wood found in Cyprus. There is scope for the sale of such articles both locally and abroad. All forest operations and the greater part of the exploitation of the forest products are conducted by the Forest Department, direct or under contract.

3.—FISHERIES.

Catch of Fish.			Number of boats and persons engaged in fishing.	General information regarding the industry and the possibilities of its development.
Kind of Fish.	Quantity. okes	Landed value.	Number of boats engaged in fishing 395 (including 9 sponge boats.)	In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats has certainly increased of late years but there is still plenty of room for improvement. Three Italian and one Greek sailing trawlers did good work during the year and demonstrated the practicability of increasing the production of this very valuable article of diet by more up-to-date methods than those practised by Cypriots.

The fishing is principally carried on by fishermen from the Greek Islands who arrive in the Island in the spring and fish through the summer.

Each boat must be provided with a licence according to capacity, the following fees being charged :—

	£	s.
(*a*) For each boat fitted with machine diving apparatus, crew not exceeding 30 persons	1	0
(*b*) For each boat fitted with the "Fernez" apparatus only, crew not exceeding 15 persons	1	0
(*c*) For each boat with naked divers, crew not exceeding 8 persons	1	0
(*d*) For each boat with harpoon (kamaki), crew not exceeding 6 persons	–	10

In addition to the licence fee Machine Boats and Boats with divers pay 25% of their catch to Government and Harpoon Boats 20%.

In 1933 7 Harpoon Boats from the Greek Islands and 1 from Cyprus, and 1 machine boat worked from April to September.

The total catch was 1,209 okes.

(*b*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.

There is also a large number of primitive oil mills (with an output of over one million okes) and primitive rope making establishments of which particulars are unobtainable.

(*c*) Primitive kilns, of which no details are available, are also found in certain localities.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarized statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

Cyprus is essentially an agricultural country, and the agricultural population is extremely conservative. Nevertheless, owing perhaps largely to the dry conditions of the past three years, coupled with the low prices offered for the smaller quantities of exportable produce, farmers have shown an increased desire to improve their methods. Furthermore, the loss or partial loss of some nearby markets for certain products owing to tariff and other restrictive measures has brought home to producers and exporters the necessity of searching for alternative crops and markets.

During 1933 the main agricultural developments were connected rather with marketing than production, and were rendered possible only by an improvement in the quality of produce offered.

A considerable improvement in the grading and packing of citrus fruit for export resulted in increased sales in the United Kingdom and Northern Europe. This improvement was assisted and fostered by the introduction by Government of an inspection service, by regulations governing the exportation of citrus fruit and pomegranates, and by intensive propaganda, advice and instruction.

There has been an expansion of the exportation of wines to the United Kingdom, which is the result of increased demand due to improvement in quality. This improvement is due in large measure to propaganda carried out by the Government and to instruction and assistance afforded by it to producers.

A steady demand exists in neighbouring countries for cattle, mules and donkeys from Cyprus. Unfortunately unfavourable seasons have somewhat reduced the supplies of animals available to meet this demand, but the services maintained by Government at Stud Stables throughout the Island and the provision of premium donkeys and other stud animals on loan have maintained and improved the quality of the stock.

The flax industry continued to receive particular support. Specially trained Flax Instructors were provided to assist and advise growers, and the scutching mills at Yeroskipos and Zodhia were enabled to scutch flax at a special cheap rate.

The provision of Tobacco Instructors by Government to assist the growers and instruct them in the proper methods of growing and preparing tobacco was continued. Much of this tobacco is consumed locally.

The silk industry was carried on under the close supervision of Inspectors, who are responsible by law for encouraging and assisting production and giving advice. Prices are at present not such as to encourage increased interest in this industry.

The threshing machinery and tractors purchased from funds granted by the Empire Marketing Board have aroused considerable interest. Owing to the poor harvest the demand for the use of these implements was small in 1933, but it is expected to increase in 1934.

Apart from these special forms of assistance to particular industries, the Agricultural Department of the Colony continues to give advice, to encourage the cultivation of all suitable crops, to assist agriculturists, to control animal and plant diseases, and, generally, to foster agriculture, the main industry of the Colony, in all its branches.

The investigations to locate sub-soil water with the aid of the drilling plants were continued during the year. The amount of additional water made available from these activities was 1,142,640 gallons per day. Twenty-six wells were drilled, aggregating 4,960 feet of borehole, and of this number 16 wells were successfully carried to a second source producing the amount of water mentioned above.

Owing to lack of funds re-afforestation was only possible on a small scale and only small extensions to the old plantations were made. During the year some forest lands were ploughed, harrowed and sown by a tractor, and 12,647 seedlings were sold to private individuals.

Mining, whilst continuing to be affected by the limited demand for minerals and metals, would appear to have a distinctly better outlook than for some years past. The Cyprus Mines Corporation commenced the construction of a large metallurgical plant for the treatment of its pyrite ore in the Island, and the Asbestos Company, by reason of a temporary reduction of royalty, was able to find new markets for its asbestos. Both mines have thus been enabled to work more continuously and employ an increased number of persons.

Prospecting is still confined to the mining companies engaged in systematic drilling, the results of which are not generally encouraging.

Among minor industries, carpet-making and broom-making showed continued activity.

Shoe-making and furniture-making are progressing. A number of wooden articles is manufactured by, or in accordance with designs of the Forest Department both for local use and for export. The number of articles so manufactured is increasing and the local carpenters and furniture-makers are copying the Forest Department's designs.

The art of embroidery is also well advanced ; a great number of girls and women are engaged on needlework and lace-making. Lace is in wide demand abroad.

The making of stockings by machinery mainly for local use has spread considerably and the industry of hat-making, for ladies, is gaining ground.
