NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. The amount to be paid was determined to be £87,686 per annum; this to be in addition to 4,166,220 okes of Salt to be paid in kind.

The sum of £113 11s. 3d. per annum also became payable, under the same Annex, since the 4th September, 1884, when the Cyprus Government took over the administration of the Lighthouse Service in the Island. This sum represents 22% of the receipts of the Ottoman Lighthouse Administration which the Sublime Porte enjoyed under the concession granted the Company for lighting the Coast of Cyprus.

By a further Agreement of 3rd February, 1879, a further sum of £5,000 was to be paid annually to the Porte in respect of the produce of State lands.

General information regarding the industry and the possibilities of development

Although the forests of Cyprus were delimited with an area of 703 square miles in 1892 they now comprise an area of 633 square miles. They are situated on the two main ranges of mountains :—

(*a*) the southern range, extending across the south-western end of the Island, from Stavrovouni to Cape Acamas ; and

(*b*) the northern range, running from Cape Andreas to Cape Kormakiti. Except at the western end, where there are 15 square miles of forest, the forests on the northern range are confined to the hill tops.

There are eight main forests, namely:

	Area
(1) Paphos and Kykko	232.90 square miles
(2) Troödos	42.10 ,,
(3) Adelphi	48.08 ,,
(4) Machæra	11.11 ,,

Forest Plantations ... ... 10 square miles

Of these 106 square miles are either bare, burnt, "cut-over" or comprise rocky, river bed, road, path or other non-forest-bearing areas.

There are also mixed timber and scrub forests covering a total area of 240.64 square miles of which 100 square miles are rocky, bare, burnt or "cut-over," road, path or river bed areas.

The principal forest trees are :—

Pinus Halepensis ; Pinus Nigra, Subsp. (Pallasiana) ; Cupressus Sempervirens ; Quercus Alnifolia ; Platanus Orientalis ; Alnus Orientalis ; Cedrus Brevifolia ; Arbutus Andrachne.

There are seven Saw Mills situated in the forests and one in Nicosia which partially meet the timber requirements of the Island. Planks, boards, scantlings and rafters are chiefly cut, but also woollen implements, such as shovels and forks, and cart material, such as felloes and spokes, are also made.

Except for the permits mentioned in the annexed table, all forest operations and exploitation of the forest products are conducted by the Forest Department.

* Permits for small quantities issued to villagers.

General Information regarding the industry and the possibilities of its development

In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats have certainly increased of late years but there is still plenty of room for improvement. Two Italian sailing trawlers did good work during the latter part of the year at Limassol and demonstrated the practicability of increasing the production of this very valuable article of diet by more up to date methods than those practised by Cypriots.

The sponge fishing has since the year 1903 been entirely under the control of the Government.

The fishing is principally carried on by fishermen from the Greek Islands who arrive in the Island in the spring and fish through the summer.

Each boat must be provided with a licence according to capacity, the following fees being charged:—

	£	s.
(*a*) For each boat fitted with machine diving apparatus, crew not exceeding 30 persons.	1	0
(*b*) For each boat fitted with the "Fernez" apparatus only, crew not exceeding 15 persons.	1	0
(*c*) For each boat with naked divers, crew not exceeding 8 persons.	1	0
(*d*) For each boat with harpoon (kamaki) crew not exceeding 6 persons.		10

In addition to the licence fee Machine Boats and Boats with divers pay 25% of their catch to Government and Harpoon Boats 20%.

In 1928 9 Machine Boats and 2 Harpoon Boats from the Greek Islands worked from May to September. No Cyprus boats fished during 1928.

The total catch was 2,393 okes.

(*a*) Some small factories are not included in this return.
(*b*) This factory started business very late in the year and no returns are available.
(*c*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.
There is also a large number of primitive oil mills (with an output of over one million okes) and primitive rope making establishments of which particulars are unobtainable.
(*d*) Primitive kilns, of which no details are available, are also found in certain localities.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

Cyprus is essentially an agricultural rather than an industrial country. Progress has been well maintained during the year and primitive methods of husbandry are gradually giving way to modern and scientific methods as is shown by the continued increase in the importation of mechanical tractors, agricultural machinery and chemical manures.

The cultivation of potatoes has been taken up by the people on a more extensive scale and Cyprus potatoes, which are of a fine quality, are now being exported in large quantities to adjacent countries.

The cultivation of citrus fruits has been considerably extended and a large export trade in oranges and lemons is being built up. A local factory has been established for the expression of orange and lemon juices.

Investigation of sub-soil waters, with the aid of the drills imported by the Government, was carried out during the year with satisfactory results. Thirty-two wells were drilled, aggregating 4,600 feet of borehole, and a total of 19 wells were carried to second water, thus making available 1½ million gallons of water per day. Of these, 4 were artesian flowing wells with a total output of 466,000 gallons per day.

Animal and poultry breeding is progressing satisfactorily and there is a steady and growing demand for Cyprus animals and poultry in neighbouring countries.

Re-afforestation under the Forest Department is being pushed forward as rapidly as funds permit. Tree planting is now being eagerly taken up by private individuals and over 225,000 forest tree seedlings have been distributed by the Forest Department for the purpose. Several new plantations were commenced during the year. Tree seed sowing with a tractor, plough, harrow and drill is being continued.

Development has been considerable in the following industries: mining (especially asbestos, cupriferous pyrites, chrome, umber, and gypsum), wine and spirit making, tanning, cheese making, flax, cotton, silk, and carob grinding.

The manufacture of cigarettes is a thriving local industry. Cyprus-grown tobacco is now finding a market in the United Kingdom and the cultivation of the Latakia variety has been extended as well as those of the yellow cigarette tobaccos.

A new factory was established for the crushing of carobs and another one, at Amiandos, for the manufacture of asbestos, bricks and tiles.

New factories were also established during the year for the manufacture of wines and spirits, gypsum, soap, cotton, macaroni, mineral waters and ice. Leather-curing showed continued activity and the factory established last year for the tanning of hides and skins has made good progress. There has also been a marked increase in the number of flour-mills.

Activity continues to be shown in the industry of weaving. A great variety of silk and cotton fabric of excellent quality is manufactured and finds a ready sale in both European and local markets notwithstanding the fact that the manufacture is conducted in a primitive method by means of hand looms which are made locally.

A silk filature, owned by the Cyprus Silk Filature, Ltd., and established on the most up-to-date lines, is in operation and is turning out silk of excellent quality.

Among minor industries, carpet-making, broom-making, and fruit-preserving showed continued activity. The jam and fruit canning factory established by the Agricultural Department has done good work and it is hoped will lead to the establishment of others in the near future. Bee-keeping on modern methods is developing. Cyprus honey was awarded a Certificate of Merit at the National Show of Bees and Honey at the Crystal Palace in September, 1928, in the class open to Dominions and Colonies only. The manufacture of soap has progressed appreciably and is gradually coming into the foreground of industrial development.

Furniture-making and shoe-making have progressed considerably.

The art of embroidery is also well advanced; a great number of girls and women are engaged on needlework and lace-making. The latter is in wide demand abroad.

The making of stockings by machinery mainly for local use has spread considerably and the industry of hat-making, for ladies, is gaining ground.

No Government grants for the development of industries have been made during the year. A special law was passed during the year so as to ensure that the quality of Cyprus wines exported to Great Britain, Ireland and the British Colonies is equal to the standard required for sale and competition in British markets; and with a view to encouraging the tanning industry in its first steps Government has allowed the importation into the Colony, free of Customs duties, of certain tanning extracts and chemical substances, and skins imported for use in tanning.
