Amount of Original Debt	Amount repaid	Amount outstanding at end of year under Review	To whom due	Rate of Interest
£615,000	Nil.	£615,000	Stockholders	4 per cent.

NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. The amount to be paid was determined to be £87,686 per annum; this to be in addition to 4.166,220 okes of Salt to be paid in kind.

The sum of £113 11s. 3d. per annum also became payable, under the same Annex, since the 4th September, 1884, when the Cyprus Government took over the administration of the Lighthouse Service in the Island. This sum represents 22% of the receipts of the Ottoman Lighthouse Administration which the Sublime Porte enjoyed under the concession granted the Company for lighting the Coast of Cyprus.

By a further Agreement of 3rd February, 1879, a further sum of £5,000 was to be paid annually to the Porte in respect of the produce of State lands.

The above annual payments, which total £92,799 11*s.* 3*d.*, are chargeable against the Revenues of the Colony in respect of its share of the Turkish Public Debt charge, but an Imperial Parliamentary Grant of a like amount is made to the Colony annually to cover the total charge.

Concessions and Permits			General information regarding the industry and the possibilities of development
Concessions, cutting permits, etc.	No.	Area covered.	The present area of State forests is 633 sq. miles representing 18% of the total area of the island. Approximately 14% of these forests are situated in the hill catchment areas. The remainder consist of scrub forests or plantations in the plains. The principal forest species are :— *Pinus halepensis ; Pinus nigra,* var. *caramanica ; Cupressus sempervirens ; Cedrus brevifolia ; Platanus orientalis ; Alnus orientalis ; Quercus alnifolia ; Arbutus andrachne ; Juniperus* species. The main hill forests are managed primarily for water conservancy. They are also the principal sources of timber. The lowland forests and plantations yield a large part of the island's fuel and charcoal supply. Local timber and forest industries have been entrusted to private enterprise, which has developed rapidly in recent years. The Forest Department's sawmills, of which there are five in operation, are leased to private timber companies. Approximately 25.5% of the island's timber consumption is supplied from the State forests. It is expected that the outturn of local timber will be increased as more of the main forests come under working plan organization.

3.—FISHERIES.

Catch of Fish.			Number of boats and persons engaged in fishing.	General information regarding the industry and the possibilities of its development.
Kind of Fish.	Quantity. okes	Landed value.	Number of boats engaged in fishing 201	In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats has certainly increased of late years but there is still plenty of room for improvement. Three Italian and one Cypriot sailing trawlers did good work during the year and demonstrated the practicability of increasing the production of this very valuable article of diet by more up-to-date methods than those practised by Cypriots.

(*c*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.

(*d*) Primitive kilns, of which no details are available, are also found in certain localities.

(*e*) Work commenced late owing to change in the lessee.
There is also a large number of primitive oil mills (with an output of over one million okes) and primitive rope making establishments of which particulars are unobtainable.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarized statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

Cyprus is essentially an agricultural country, and the agricultural population is extremely conservative. Nevertheless owing to the lower prices offered for exportable produce and the loss or partial loss of some nearby markets for certain products on account of tariff or other restrictive measures, the necessity of searching for alternative crops and markets has been brought home to producers and exporters. Furthermore farmers have shown an increased desire to improve their methods.

In recent years the main agricultural developments were connected rather with marketing than production and to a great extent these conditions applied during 1935. Better marketing and increased production were rendered possible only by an improvement in the quality of produce offered. Local wheat production was protected by a continuation of protective duties on imported flour.

The grading and packing of citrus fruit for export is now on a better basis and although the whole work is done by hand, the standards of various grades of fruits are much improved. The principal consuming markets were the United Kingdom and Northern Europe again, but owing to defective shipping arrangements and to a short crop, the exports during 1935 declined. The fruit inspection service is working satisfactorily and by regulations governing the exportation of citrus fruit and other scheduled products, by intensive propaganda, advice and instructions and by rigid inspections carried out at the ports of exportation, the standard of agricultural produce for export has definitely been raised.

The export of wines to the United Kingdom continued on the same scale as in previous years. The quality of wine exported is steadily improving, but the bulk of village made wines are still of poor quality and quite unfit for the better class markets. This improvement is due in large measure to propaganda carried out by the Government and to instruction and assistance afforded by it to producers.

A steady demand exists in neighbouring countries for cattle, mules and donkeys from Cyprus. Owing to adverse conditions during the previous years of drought the supplies of animals are insufficient to meet the demand, but the services maintained by Government at Stud Stables throughout the Island and the provision of premium donkeys and other stud animals on loan have maintained and improved the quality of the stock and the numbers of animals available for export are now on the increase.

The flax spinning and weaving establishment formerly at Zodhia has been transferred to Nicosia and the flax scutching mill at Yeroskipos was conducted during the year by private enterprise with the advice and assistance of flax officers of the Agricultural Department.

The provision of Tobacco Instructors by Government to assist the growers and instruct them in the proper methods of growing and preparing tobacco was continued. The export of yellow leaf tobacco is now allowed only under a licence to export held by the Cyprus Cigarette Company. There was little demand for fumigated tobacco.

The silk industry was carried on under the close supervision of Inspectors, who are responsible by law for encouraging and assisting production and giving advice. Prices are at present not such as to encourage increased interest in this industry.

Grants have been sanctioned by the Lords Commissioners of the Treasury from the Colonial Development Fund for (*a*) Completion of the Agricultural Experiment Stations at Morphou, Saitta and Trikoukkia—£5,000; (*b*) Purchase of Stud Animals for the Government Stock Farm—£2,000 and (*c*) Construction of Produce Inspection Sheds—£3,150.

Apart from these special forms of assistance to particular industries, the Agricultural Department of the Colony continues to give advice, to encourage the cultivation of all suitable crops, to assist agriculturists, to control animal and plant diseases, and, generally, to foster agriculture, the main industry of the Colony, in all its branches, by means of its various organized technical services and by instruction given by itinerant agricultural officers.

The investigations to locate sub-soil water with the aid of the drilling plants were continued during the year. The amount of additional water made available from these activities was 4,571,760 gallons per day. Forty-four wells were drilled, aggregating 6,142 feet of borehole, and of this number 28 wells were successfully carried to a second source producing the amount of water mentioned above.

Owing to lack of funds re-afforestation by artificial methods had to be reduced to small scale experiments and to repair-planting in existing plantations. Some 9,016 seedlings were sold to private individuals during the year.

An improvement in the demand for base metals has had a favourable effect upon this section of the mining industry, resulting in increased exports of cupriferous pyrites by the Cyprus Mines Corporation. Operations by the Cyprus & General Asbestos Company, Ltd., however, have been somewhat curtailed during the year under review owing to reduced sales of asbestos fibres. The amount of labour employed in the mining industry showed a slight increase on the figures for the preceding year.

A feature of the year has been the increased activity shown in prospecting due to a search for deposits containing precious metals. These operations have met with a fair measure of success in several localities and development work is proceeding.

Among minor industries, carpet-making and broom-making showed continued activity.

Shoe-making and furniture-making are progressing. Owing to change in policy, the Forest Department gave up letting contracts for the manufacture and sale of wooden articles but carpenters are continuing this method of working in wood, following the original work started by the Forest Department.

The art of embroidery is also well advanced; a great number of girls and women are engaged on needlework and lace-making. Lace is in wide demand abroad.

The making of stockings by machinery mainly for local use has spread considerably and the industry of hat-making, for ladies, is gaining ground.
