NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. Although the forests of Cyprus were delimited with an area of ' square miles in 1892 they now comprise an area of 633.6 square mi

They are situated on the two main ranges of mountains :—

(*a*) the southern range, extending across the south-western end the Island, from Stavrovouni to Cape Akamas ; and

(*b*) the northern range, running from Cape Andreas to C Kormakiti. Except at the western end, where there are 15 squ miles of forest, the forests on the northern range are confined to hill tops.

There are eight main forests, namely:

	Area
(1) Paphos and Kykko	236.00 square m
(2) Troödos	39.00 ,,
(3) Adelphi	50.21 ,,
(4) Machæra	14.50 ,,

Of these 73.50 square miles are either bare, burnt, "cut-over comprise rocky, river bed, road, path or other non-forest-bearing a

There are also mixed timber and scrub forests covering a l area of 233.67 square miles of which 117.00 square miles are ro bare, burnt or "cut-over," road, path or river bed areas.

The principal forest trees are :—

Pinus Halepensis ; Pinus Nigra, Subsp. (Pallasiana) ; Cupr Sempervirens ; Quercus Alnifolia ; Platanus Orientalis ; A Orientalis ; Cedrus Brevifolia ; Arbutus Andrachne.

There are seven Saw Mills situated in the forests and one in Ni which partially meet the timber requirements of the Isl Planks, boards, scantlings and rafters are chiefly cut, but also wo implements, such as shovels and forks, and cart material, such felloes and spokes, are also made.

Except for the permits mentioned in the annexed table forest operations and exploitation of the forest products are ducted by the Forest Department.

* Permits for small quantities issued to villagers.

3.—FISHERIES.

Catch of Fish			Number of boats and persons engaged in fishing	General Information regarding the industry and the possibilities of its development
Kind of Fish	Quantity okes	Landed value		
		£	Number of boats engaged in fishing 177 (including 6 sponge boats.)	In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats has certainly increased of late years but there is still plenty of room for improvement. Two Italian sailing trawlers did good work during the year and demonstrated the practicability of increasing the production of this very valuable article of diet by more up-to-date methods than those practised by Cypriots.

6.—INDUSTRIAL ESTABLISHMENTS AND MANUFACTORIES

(so far as not included under sub-sections 1-5 above).

Note.—The figures in this table must be regarded in many cases as approximate only, as many establishments are owned by illiterate persons who keep no reliable books.

(*a*) Some small factories are not included in this return.

(*b*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.

There is also a large number of primitive oil mills (with an output of over one million okes) and primitive rope making establishments of which particulars are unobtainable.

(*c*) Primitive kilns, of which no details are available, are also found in certain localities.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

Cyprus is essentially an agricultural rather than an industrial country. Satisfactory progress has been made during the year and the gradual change from primitive to more modern methods of husbandry continues. A greater interest is taken in the use of modern agricultural implements and machinery and in the use of chemical fertilizers.

The cultivation of potatoes, both summer and winter crops, has maintained the high level attained in recent years. Cyprus potatoes, which are of a fine quality, are exported in large quantities to adjacent countries.

The cultivation of citrus fruits has been considerably extended and a large export trade in oranges and lemons is being built up. The extension of the citrus industry is receiving every encouragement. The Department of Agriculture is supplying citrus plants to growers and is giving instruction and demonstrations in the proper methods of laying out new gardens. Two new citrus experimental stations have been established as well as a special citrus nursery.

The investigations to locate sub-soil water with the aid of the drilling plants were well maintained during the year. The amount of additional water made available from these activities was 1,104,600 gallons per day. Forty-two wells were drilled, aggregating 6,472 feet of borehole, and of this number 16 wells were successfully carried to a second source producing the amount of water mentioned above. Of these, 5 are artesian flowing wells with a total output of 355,000 gallons per day.

There has been a great demand for Cyprus mules and donkeys, and several lots have been supplied to Iraq, Egypt and Palestine. The Manager of the Stock Farm at Athalassa supplied breeding stock to the District stud stables, and the usual number of stud animals has been maintained. A new stud stable has been opened and many improvements have been effected in the existing stud stables.

Re-afforestation under the Forest Department is being pushed forward as rapidly as funds permit. Tree-planting is now being eagerly taken up by private individuals and over 100,800 forest tree seedlings have been distributed by the Forest Department for the purpose. Several new plantations were commenced during the year. Tree seed sowing with a tractor, plough, harrow and drill is being continued.

Mining development has been well maintained, and the export of pyrites, asbestos, terra umbra and chrome has again exceeded the figures of previous years. The advent of influential mining companies from England and America has resulted in a large increase in the number of applications for prospecting permits, and drilling operations are now in progress on many areas.

Development has been considerable in the following industries: wine and spirit making, tanning, cheese making, flax, cotton, silk, and carob grinding. With a view to encouraging the local flax industry the Empire Marketing Board has made a grant of £2,500 spread over a period of three years, the Cyprus Government providing an equal amount. The Zodia Scutching Mill, which has been leased in connection with this scheme, was worked to full capacity during the year.

The manufacture of cigarettes is a thriving local industry. Cyprus-grown tobacco is now finding a market in the United Kingdom and the cultivation of the Latakia variety has been extended as well as those of the yellow cigarette tobaccos. There has been an increase in the acreage of tobacco and a considerable improvement in the quality due to the activities of the special staff of tobacco instructors of the Department of Agriculture. With an improvement in the marketing conditions further progress is evident.

Leather-curing showed continued activity and the factory for the tanning of hides and skins has made good progress.

Activity continues to be shown in the industry of weaving. A great variety of silk and cotton fabric of excellent quality is manufactured and finds a ready sale in both European and local markets notwithstanding the fact that the manufacture is conducted in a primitive method by means of hand looms which are made locally.

A silk filature, owned by the Cyprus Silk Filature, Ltd., and established on the most up-to-date lines, is in operation and is turning out silk of excellent quality. A Sericultural Conference was held early in the year, and further development of the silk industry is receiving the close attention of the Government.

Among minor industries, carpet-making, broom-making, and fruit-preserving showed continued activity. The jam and fruit canning factory established by the Department of Agriculture has done good work and the establishment of privately owned factories is projected.

Bee-keeping on modern methods is developing.

The manufacture of soap has progressed appreciably and is gradually coming into the foreground of industrial development.

Furniture-making and shoe-making are progressing.

The art of embroidery is also well advanced; a great number of girls and women are engaged on needlework and lace-making. The latter is in wide demand abroad.

The making of stockings by machinery mainly for local use has spread considerably and the industry of hat-making, for ladies, is gaining ground.

No Government grants for the development of industries have been made during the year, excepting the grant for the development of the flax industry mentioned above.

LABOUR, WAGES AND COST OF LIVING.
