Concessions and Permits			General information regarding the industry and the possibilities of development
Concessions, cutting permits, etc.	No.	Area covered.	
	State Forests.		The present area of State forests is 633 sq. miles representing 18% of the total area of the island. Approximately 14% of these forests are situated in the hill catchment areas. The remainder consist of scrub forests or plantations in the plains.
			The principal forest species are :— *Pinus halepensis ; Pinus nigra*, var. *caramanica ; Cupressus sempervirens ; Cedrus brevifolia ; Platanus orientalis ; Alnus orientalis ; Quercus alnifolia ; Arbutus andrachne ; Juniperus* species.
Permits for cutting :		Defined locally	
(*a*) timber * ...	330	on the spot.	
(*b*) fuel *	722	,,	The main hill forests are managed primarily for water conservancy. They are also the principal sources of timber. The lowland forests and plantations yield a large part of the island's fuel and charcoal supply.
Permits for the distillation of origanum oil	1	236.00 sq. miles	
Grazing and other permits	484	Defined locally on the spot.	Local timber and forest industries have been entrusted to private enterprise, which has developed rapidly in recent years. The Forest Department's sawmills, of which there are six in operation, are leased to private timber companies.
	Church, Monasterial and Private Forests and Woodlands.		Approximately 25.5% of the island's timber consumption is supplied from the State forests.
No reliable returns are available			It is expected that the outturn of local timber will be increased as more of the main forests come under working plan organization.

* Permits for small quantities issued to villagers.

3.—FISHERIES.

Catch of Fish.			Number of boats and persons engaged in fishing.	General information regarding the industry and the possibilities of its development.
Kind of Fish.	Quantity. okes	Landed value.	Number of boats engaged in fishing	In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats has certainly increased of late years but there is still plenty of room for improvement. Three Italian and one Greek sailing trawlers did good work during the year and demonstrated the practicability of increasing the production of this very valuable article of diet by more up-to-date methods than those practised by Cypriots.

The sponge fishing has since the year 1903 been entirely under the control of the Government.

The fishing is principally carried on by fishermen from the Greek Islands who arrive in the Island in the spring and fish through the summer.

Each boat must be provided with a licence according to capacity, the following fees being charged :—

	£	s.
(*a*) For each boat fitted with machine diving apparatus, crew not exceeding 30 persons	1	0
(*b*) For each boat fitted with the "Fernez" apparatus only, crew not exceeding 15 persons	1	0

(*d*) For each boat with harpoon (kamaki), crew not exceeding 6 persons		10

In addition to the licence fee Machine Boats and Boats with divers pay 25% of their catch to Government and Harpoon Boats 20%.

In 1934 18 Harpoon and 14 Machine Boats from the Greek Islands and 1 Cypriot Machine Boat worked from May to September.

The total catch was 5,276 okes.

(*a*) Some small factories are not included in this return.

(*b*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.

There is also a large number of primitive oil mills (with an output of over one million okes) and primitive rope making establishments of which particulars are unobtainable.

(*c*) Primitive kilns, of which no details are available, are also found in certain localities.

(*d*) This factory worked only 2 months and closed.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarized statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

Cyprus is essentially an agricultural country, and the agricultural population is extremely conservative. Nevertheless owing to the lower prices offered for exportable produce and the loss or partial loss of some nearby markets for certain products on account of tariff or other restrictive measures, the necessity of searching for alternative crops and markets has been brought home to producers and exporters. Furthermore farmers have shown an increased desire to improve their methods.

During 1934, as was the case in the previous year, the main agricultural developments were connected rather with marketing than production, and were rendered possible only by an improvement in the quality of produce offered. In order to protect the local wheat production protective duties were imposed on imported foreign flour.

A considerable improvement in the grading and packing of citrus fruit for export resulted in increased sales in the United Kingdom and Northern Europe. This improvement was assisted and fostered by the newly-organized fruit inspection service, by regulations governing the exportation of citrus fruit and pomegranates, and by intensive propaganda, advice and instruction.

There has been an expansion of the exportation of wines to the United Kingdom, which is the result of increased demand due to improvement in quality. This improvement is due in large measure to propaganda carried out by the Government and to instruction and assistance afforded by it to producers.

A steady demand exists in neighbouring countries for cattle, mules and donkeys from Cyprus. Unfortunately unfavourable seasons have somewhat reduced the supplies of animals available to meet this demand, but the services maintained by Government at Stud Stables throughout the Island and the provision of premium donkeys and other stud animals on loan have maintained and improved the quality of the stock.

The flax spinning and weaving establishment at Zodhia and the flax scutching mills at Zodhia and Yeroskipos were conducted during the year by private enterprise with the advice and assistance of flax officers of the Agricultural Department.

The provision of Tobacco Instructors by Government to assist the growers and instruct them in the proper methods of growing and preparing tobacco was continued. Much of this tobacco is consumed locally, but there is also an increased interest in the use of Cyprus yellow-leaf tobacco for the manufacture of Cyprus cigarettes in the cigarette factories established in England.

The silk industry was carried on under the close supervision of Inspectors, who are responsible by law for encouraging and assisting production and giving advice. Prices are at present not such as to encourage increased interest in this industry, and owing to the unremunerative price of silk the Silk Filature at Yeroskipos was closed down.

The threshing machinery and tractors purchased from funds granted by the Empire Marketing Board have aroused considerable interest. The demand for the use of the threshing machinery is not yet up to the full working capacity but the demand by the more enterprising and enlightened farmers is steadily increasing.

Apart from these special forms of assistance to particular industries, the Agricultural Department of the Colony continues to give advice, to encourage the cultivation of all suitable crops, to assist agriculturists, to control animal and plant diseases, and, generally, to foster agriculture, the main industry of the Colony, in all its branches, by means of its various organized technical services and by instruction given by itinerant agricultural officers.

The investigations to locate sub-soil water with the aid of the drilling plants were continued during the year. The amount of additional water made available from these activities was 1,495,584 gallons per day. Twenty-five wells were drilled, aggregating 4,929 feet of borehole, and of this number 12 wells were successfully carried to a second source producing the amount of water mentioned above.

Owing to lack of funds re-afforestation by artificial methods had to be reduced to small scale experiments and to repair-planting in existing plantations. Some 9,016 seedlings were sold to private individuals during the year.

Continued low prices and a restricted demand in the European markets have adversely affected the sales of copper and sulphur. The Cyprus Mines Corporation has completed the construction of the new metallurgical plant and is now in a position to ship high-grade concentrates. The Corporation has also actively worked the gold-bearing lode at Skouriotissa with encouraging results, and the Cyprus and General Asbestos Company, Ltd., in spite of keen competition, has increased its sales of low-grade fibre. The amount of labour employed on both mines is well maintained.

There has been an increase in the number of prospecting permits issued, but on outstanding discoveries are to be recorded.

Among minor industries, carpet-making and broom-making showed continued activity.

Shoe-making and furniture-making are progressing. Owing to change in policy, the Forest Department gave up letting contracts for the manufacture and sale of wooden articles, but one carpenter is continuing and others in various parts of the Island are taking up this kind of working in wood. The manufacture of wooden articles by the local carpenters is increasing, following the original work started by the Forest Department.

The art of embroidery is also well advanced; a great number of girls and women are engaged on needlework and lace-making. Lace is in wide demand abroad.

The making of stockings by machinery mainly for local use has spread considerably and the industry of hat-making, for ladies, is gaining ground.
