Amount of Original Debt	Amount repaid	Amount outstanding at end of year under Review	To whom due	Rate of Interest
£615,000	Nil.	£615.000	Stockholders	4 per cent.

NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. The amount to be paid was determined to be £87,686 per annum; this to be in addition to 4,166,220 okes of Salt to be paid in kind.

The sum of £113 11s. 3d. per annum also became payable, under the same Annex, since the 4th September, 1884, when the Cyprus Government took over the administration of the Lighthouse Service in the Island. This sum represents 22% of the receipts of the Ottoman Lighthouse Administration which the Sublime Porte enjoyed under the concession granted the Company for lighting the Coast of Cyprus.

By a further Agreement of 3rd February, 1879, a further sum of £5,000 was to be paid annually to the Porte in respect of the produce of State lands.

The above annual payments, which total £92,799 11s. 3*d.*, are chargeable against the Revenues of the Colony in respect of its share of the Turkish Public Debt charge, but an Imperial Parliamentary Grant of a like amount is made to the Colony annually to cover the total charge.

Particulars of any Town Planning Scheme in progress.	A Town Planning Scheme for the Old Town of Famagusta was put into effect during 1937. This scheme provides for the widening and straightening of certain streets, for the preservation and extension of certain open spaces and for the eventual making of new streets. The main purpose of the scheme is to preserve the architectural amenities of the Old Town and to secure that they are exhibited to the best advantage.

Concessions and Permits			General information regarding the industry and the possibilities of development
Concessions, cutting permits, etc.	No.	Area covered.	
	State Forests.		The present area of State forests is 622 sq. miles representing 17% of the total area of the island. Approximately 14% of these forests are situated in the hill catchment areas. The remainder consist of scrub forests or plantations in the plains.
Permits for cutting : fuel *	401	Defined locally on the spot.	The principal forest species are :— *Pinus halepensis ; Pinus nigra*, var. *caramanica ; Cupressus sempervirens ; Cedrus brevifolia ; Platanus orientalis ; Alnus orientalis ; Quercus alnifolia ; Arbutus andrachne Juniperus* species.
Permits for the distillation of origanum oil	1	236.00 sq. miles	The main hill forests are managed primarily for water conservancy. They are also the principal sources of timber. The lowland forests and plantations yield a large part of the island's fuel and charcoal supply.
Permits for collecting Bay laurel leaves ...	1		Local timber and forest industries have been entrusted to private enterprise, which has developed rapidly in recent years. The Forest Department's sawmills, of which there are six in operation, are leased to private timber companies.
Grazing and other permits	506	Defined locally on the spot.	Approximately 48% of the island's timber consumption is supplied from the State forests.
	Church, Monasterial and Private Forests and Woodlands.		It is expected that the outturn of local timber will be increased as more of the main forests come under working plan organization.
No reliable returns are available			

* Permits for small quantities issued to villagers.

11. Seasons of fisheries and description of area fished.

All the year round. In Cyprus waters within a mile or two of the shore.

12. General information regarding the industry and the possibilities of its development.

In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best weather and in consequence the supply of fish is not equal to the demand. The number of boats has certainly increased of late years but there is still plenty of room for improvement. Two Greek, one Italian, two Syrian and one Cypriot sailing trawlers did good work during the year and demonstrated the practicability of increasing the production of this very valuable article of diet by more up-to-date methods than those practised by Cypriots.

The sponge fishing has since the year 1903 been entirely under the control of the Government.

The fishing is principally carried on by fishermen from the Greek and Italian Islands who arrive in the Island in the spring and fish through the summer.

Each boat must be provided with a licence according to capacity, the fees being charged:—

	£	s.
(*a*) For each boat with diving apparatus	1	0
(*b*) For each boat with harpoon (kamaki) naked diving	—	10

In addition to the licence fee boats with diving apparatus pay 25% of their catch to Government and harpoon boats 20%.

In 1937 4 harpoon boats from the Italian Islands worked from June to October.

The total catch was 359 okes.

(*a*) There are no inland-water fisheries in Cyprus.

(*a*) Some small factories are not included in this return.
(*b*) These factories worked only 8½ months during the year.
(*c*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.
(*d*) Primitive kilns, of which no details are available, are also found in certain localities.
(*e*) There is also a large number of primitive oil mills with an output of over one million okes.
Several primitive rope making establishments, of which particulars are unobtainable, also exist in the Island.
