General information regarding the industry and the possibilities of development

Although the forests of Cyprus were delimited with an area of 700 square miles in 1892 these now comprise an area of 549 square miles.

They are situated on the two main ranges of mountains :—

(*a*) the southern range, extending across the south-western end of the Island, from Stavrovouni to Cape Acamas ; and

(*b*) the northern range, running from Cape Andreas to Cape Kormakiti. Except at the western end, where there are 15 square miles of forest, the forests on the northern range are confined to the hill tops.

There are six main forests, namely:

		Area
Paphos and Kykko Forests ...	232.90	square miles
Troödos	42.10	,,
Adelphi	43.08	,,
Machæra	15.26	,,
Agia Erini	3.00	,,
Karrat Dagh	3.10	,,
Total ...	349.44	,,
Forest Plantations	7	square miles

Of these 123.84 square miles are either bare, burnt "cut-over" or comprise rocky, river bed, road, paths or other non-forest-bearing areas.

There are also mixed timber and scrub forests covering a total area of 292.56 square miles of which 152.56 square miles are rocky, bare, burnt or "cut-over," road, path or river bed areas.

The principal forest trees are :—

Pinus Halepensis, Pinus Nigra Subsp. Pallasiana, Cupressus Sempervirens, Quercus Alnifolia, Platanus Orientalis, Alnus Orientalis, Cedrus Libanotica, Var. Brevifolia, Arbutus Andrachne.

There are six Saw Mills situated in the forests which partially meet the timber requirements of the Island. Planks, boards, scantlings and rafters are chiefly cut, but also wooden implements, such as shovels, forks and cart material, such as felloes and spokes are also made.

Except for the licenses mentioned in the annexed table, all forest operations and exploitation of the forest products are conducted by the Forest Department.

3.—FISHERIES.

Catch of Fish			Number of boats and persons engaged in fishing	General Information regarding the industry and the possibilities of its Development
Kind of Fish	Quantity	Landed value	Number of boats engaged in fishing	In the sea around Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman, few of them will go out except in the very best of weather and in consequence the supply of fish is not equal to the demand. The number of boats have certainly increased of late years but there is still plenty of room for improvement. Possibly the employment of a drifter or trawler might lead to the development of this most important industry and an increase in production of a very valuable article of diet.

Sponges ...	4,291 lbs.	£2,298		
	Total ...	£10,298		

The sponge fishing has since the year 1903 been entirely under the control of the Government.

The fishing in the past was principally carried on by men from the Greek Islands who arrived in the Island in the spring and fished through the summer, areas being allotted to them by the Inspector of Fisheries on payment of a fishing license: 20 or 25 per cent. of the catch (in kind) being also paid to Government.

Thus :—

Naked diving and Harpoons ... 20 per cent.
Machine diving apparatus ... 25 „

It is not anticipated that many will come in future as they now prefer other places.

In 1922 eight boats fished for sponges from May to October: 3 Cyprus Harpoon Boats and 3 Harpoon Boats and 2 Machine Boats from the Greek Islands; the total catch being 1,421 okes good sponges and 111½ okes skarta: the Government share was 308$\frac{1}{20}$ okes good and 25$\frac{3}{40}$ okes skarta.

(*a*) Some small factories are not included in this return.
(*b*) Primitive kilns, of which no details are available, are also found in certain localities.
(*c*) Details regarding these mills cannot be obtained, as very many of them are owned by illiterate persons who keep no books. The grower usually takes his grain to the mill and removes it after grinding. Mills do not generally purchase grain.
(*d*) A much larger quantity of cotton has passed through these factories than is shown but accurate details are not available owing to the difficulty of obtaining figures from illiterate growers.
There are also a large number of primitive oil mills and primitive rope making establishments of which particulars are unobtainable.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7.—A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Island during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Island.

Cyprus is essentially an agricultural rather than an industrial country. Development may be expected in the following industries: mining (especially asbestos), wine and spirit making, fishing, fruit and vegetable drying or preserving, carpet making, cotton, silk, gypsum, and industries connected with olive oil products. Animal breeding, especially of mules and donkeys, is progressing.

Tobacco planting has been resumed on a larger scale but the quality is still somewhat inferior to imported brands.

A small boat-building yard is in operation at Famagusta.

Among minor industries, bee keeping on modern methods is developing. The Cyprus bee is noted for its value in the apiary.

Activity has been shewn in the past, and especially in the last few years, in the industry of weaving. A great variety of silk and cotton fabric of excellent quality is manufactured notwithstanding the fact that their manufacture is conducted in a primitive method by the means of hand looms which are made locally.

Cotton fabric of various kinds, many of which compete with the European cashmeres, are woven in the looms and sold locally on a large scale for suits; a large portion of them is exported.

The art of embroidering is also well advanced, a great number of women and girls are engaged on needlework.

No Government grants for the development of industries have been made during the year.
