NOTE.—Under an Annex to the Convention of 4th June, 1878, between Great Britain and Turkey the former Power undertook to pay to the Porte annually a sum representing the excess of Revenue over Expenditure calculated on the average of the five years preceding the date of the Convention, excluding the produce of State and Crown lands let or sold during that period. The amount to be paid was determined to be £87,686 per annum; this to be in addition to 4.166,220 okes of Salt to be paid in kind.

The sum of £113. 11*s.* 3*d.* per annum also became payable, under the same Annex, since the 4th September, 1884, when the Cyprus Government took over the administration of the Lighthouse Service in the Island. This sum represents 22% of the receipts of the Ottoman Lighthouse Administration which the Sublime Porte enjoyed under the concession granted the Company for lighting the Coast of Cyprus.

By a further Agreement of 3rd February, 1879, a further sum of £5,000 was to be paid annually to the Porte in respect of the produce of State lands.

The above annual payments, which total £92,799. 11*s.* 3*d.*, are chargeable against the Revenues of the Colony in respect of its share of the Turkish Public Debt charge, but an Imperial Parliamentary Grant of a like amount is made to the Colony annually to cover the total charge.

(2) If ten years have elapsed 2½ per cent. of the value is taken. (3) Sales by auction of waste land, including sales by auction of land for which occupiers have failed to pay equivalent value. The above figures do not include Government buildings and trees or buildings and trees that escheated to the Crown and were sold.

The remainder consist of scrub forests or plantations in the plains.<br>The principal forest species are :—<br>*Pinus halepensis ; Pinus nigra*, var. *caramanica ; Cupressus sempervirens ; Cedrus brevifolia ; Platanus orientalis ; Alnus orientalis ; Quercus alnifolia ; Arbutus andrachne Juniperus* species.<br>The main hill forests are managed primarily for water conservancy. They are also the principal sources of timber. The lowland forests and plantations yield a large part of the island's fuel and charcoal supply.<br>Local timber and forest industries have been entrusted to private enterprise, which has developed rapidly in recent years. The Forest Department's sawmills, of which there are five in operation, are leased to private timber companies.<br>Approximately 48% of the island's timber consumption is supplied from the State forests.<br>It is expected that the outturn of local timber will be increased as more of the main forests come under working plan organization. |

**12. General information regarding the industry and the possibilities of its development.**

In the sea round Cyprus there are plenty of fish but unfortunately the Cypriot is not a fisherman. Few of them will go out except in the very best weather and in consequence the supply of fish is not equal to the demand. The number of boats has certainly increased of late years but there is still plenty of room for improvement. Two Greek and one Italian sailing trawlers did good work during the year and demonstrated the practicability of increasing the production of this very valuable article of diet by more up-to-date methods than those practised by Cypriots.

The sponge fishing has since the year 1903 been entirely under the control of the Government.

The fishing is principally carried on by fishermen from the Greek and Italian Islands who arrive in the Island in the spring and fish through the summer.

Each boat must be provided with a licence according to capacity, the fees being charged :—

In addition to the licence fee boats with diving apparatus pay 25% of their catch to Government and harpoon boats 20%.

In 1938 4 harpoon boats from the Italian Islands worked from June to October.

The total catch was 441 okes.

(*a*) There are no inland-water fisheries in Cyprus.

(*d*) There is also a large number of primitive oil mills with an output of over one million okes.

Several primitive rope making establishments, of which particulars are unobtainable, also exist in the Island.

# 7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

*7.—A summarized statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.*

Cyprus is essentially an agricultural country, and the agricultural population is extremely conservative. Nevertheless owing to the lower prices offered for exportable produce and the loss or partial loss of some nearby markets for certain products on account of tariff or other restrictive measures, the necessity of searching for alternative crops and markets has been brought home to producers and exporters. Furthermore farmers have shown an increased desire to improve their methods.

In recent years the main agricultural developments have been connected rather with marketing than production and to a great extent these conditions applied during 1938. Better marketing and increased production have been rendered possible only by an improvement in the quality of produce offered. Local wheat production was protected by a continuation of protective duties on imported flour.

The grading and packing of citrus fruit for export is now on a better basis and although the whole work is done by hand, the standards of various grades of fruits are much improved. The principal consuming markets again were the United Kingdom and Northern Europe, and owing to increased production, better direct shipping facilities were provided. The produce inspection service is working satisfactorily and by regulations governing the exportation of citrus fruit and other scheduled products, by intensive propaganda, advice and instructions and by rigid inspections carried out at the ports of exportation, the standard of agricultural produce for export has definitely been raised.

The export of wines to the United Kingdom continued on the same scale as in previous years. The quality of wine exported is steadily improving, but the bulk of village made wines is still of poor quality and quite unfit for the better class markets. Co-operative wine-making Societies are, however, increasing in number and output, and the quality of their produce, the making of which is supervised by officers of the Agricultural Department, is much in advance of that of other village wines.

A steady demand exists in neighbouring countries for cattle, mules and donkeys from Cyprus. The services maintained by Government at Stud Stables throughout the Island and the provision of premium donkeys and other stud animals on loan have maintained and improved the quality of the stock and the numbers of animals available for export. Considerable progress is being made in the poultry industry and the demand for hatching eggs and breeding stock of improved breeds from the Government Stock Farm is far in excess of supply.

The flax spinning and weaving establishment formerly at Zodhia has been transferred to Nicosia and the flax scutching mill at Yeroskipos was operated during the year by private enterprise. Hemp is also exported in small quantities.

The provision of a Tobacco Instructor by Government to assist the growers and instruct them in the proper methods of growing and preparing tobacco was continued. The export of yellow leaf tobacco is now allowed only under a licence to export held by the Cyprus Cigarette Company. There was a good demand for fumigated tobacco.

The silk industry was carried on under the close supervision of Inspectors, who are responsible by law for encouraging and assisting production and giving advice. Prices are at present not such as to encourage increased interest in this industry.

Grants were sanctioned during 1935 by the Lords Commissioners of the Treasury from the Colonial Development Fund for (*a*) Completion of the Agricultural Experiment Stations at Morphou, Saitta and Trikoukkia—£5,000; (*b*) Purchase of Stud Animals for the Government Stock Farm—£2,000 and (*c*) Construction of Produce Inspection Sheds—£3,150. Part of the grants was spent in 1936. 1937 and 1938, and the balance will be spent in 1939.

Apart from these special forms of assistance to particular industries, the Agricultural Department of the Colony continues to give advice, to encourage the cultivation of all suitable crops, to assist agriculturists, to control animal and plant diseases, and, generally, to foster agriculture, the main industry of the Colony, in all its branches, by means of its various organized technical services and by instruction given by itinerant agricultural officers.

Special attention has been given to the problem of soil erosion and areas have been selected in representative parts of the Island to demonstrate control of soil erosion.

Owing to the increased demand for fruit and forest trees the nursery work of the Department of Agriculture has been extended. Steps have been taken to enlist the collaboration of public bodies and of private individuals to develop and extend the practice of tree planting.

Location and development of subsurface water by drilling were continued during the year. Fifty-five wells were drilled, aggregating 8,305 feet: of these thirty-five were successful producing a volume of 5,259,880 gallons per day.

Owing to lack of funds re-afforestation by artificial methods had to be reduced to small scale experiments and to repair-planting in existing plantations. Some 3,721 seedlings were sold to private individuals during the year.

Mining is now an industry of primary importance to the Colony and a large section of the community benefits directly and indirectly as a result of mining operations.

Cupreous pyrites is the principal ore produced. It is shipped to overseas markets where it finds a ready demand at present owing to the disorganization in the Spanish pyrites trade.

There was an appreciable increase in the quantity exported during the year under review and further deposits of this mineral are being opened up.

The output of asbestos showed a decrease compared with the previous year.

Activity in prospecting for precious metals was less than in the previous year.

Among minor industries, carpet-making and broom-making showed continued activity. Most of the Island's requirements of soap are supplied by local soap factories.

Shoe-making and furniture-making are progressing. Owing to change in policy, the Forest Department gave up letting contracts for the manufacture and sale of wooden articles but carpenters are continuing this method of working in wood, following the original work started by the Forest Department.

An elementary system of Timber Grading was started in June, 1937. The Grading Rules were drawn up primarily for Mining timbers but are applicable to all pine timber produced in Cyprus. A grading fee of 5 *paras* per piece is levied on all timber submitted to the two authorized graders appointed by the Forest Department.

The art of embroidery is also well advanced; a great number of girls and women are engaged on needlework and lace-making. Lace is in wide demand abroad.

The making of stockings by machinery mainly for local use has spread considerably and the industry of hat-making, for ladies, is gaining ground.
