Title:	Teachers' Practice as a Marginalization Factor in the Process for
	Inclusive Education in Cyprus
Year:	2007
Author:	Angelides, Panayiotis; Vrasidas, Charalambos; Charalambous,
	Constantia
Abstract:	In recent years there is an intense effort around the world for
	integrating children considered as having special needs in their
	neighborhood schools. The function of special education in Cyprus
	has been criticized as failing because it failed to include all children
	in teaching by providing them with equal opportunities to learning.
	In this paper, using the interpretive model of research we studied
	teachers' practices as a factor of marginalization of certain children,
	how they marginalize their pupils, and attempted to understand how
	marginalization, a result of teachers' practice, works. Through data
	analysis it indicated that some teachers marginalize children
	considered as having special needs.
