Title:	A new method for assessing torsional effects in irregular buildings
Year:	2009
Author:	N.P. Bakas, N.D. Lagaros, M. Papadrakakis
Abstract:	<p>The increasing necessity to solve complex problems in Structural Dynamics and Earthquake Engineering requires the development of new ideas and innovative methods for providing accurate numerical solutions in affordable computing times. The purpose of the Conference is to bring together the scientific communities of Computational Mechanics, Structural Dynamics and Earthquake Engineering in an effort to facilitate the exchange of ideas in topics of mutual interests and to serve as a platform for establishing links between research groups with complementary activities</p>
